FOR IMMEDIATE RELEASE

Micro Key Solutions Launches New Mobile Applications

Want to access your company's financial data on the go? There's an app for that. Receive and manage service tickets from your smartphone? There's an app for that, too.

Micro Key Solutions has recently launched two mobile apps to put your company's monetary numbers and service tracking at your fingertips. From any mobile phone or tablet connected to the internet you can instantly tap into your financial dashboard, and allow your alarm technicians and installers to receive and manage their service tickets anytime, anywhere.

The ExecKEY app provides real-time financial data on your smartphone and eliminates the need to contact the accounting department or to remote into a desktop to gain access. Tech Pro will reduce drive time and labor hours, while greatly increasing the overall efficiency of your service department.

"Mobile apps are gaining a lot of momentum in our industry and we want to continue to provide our customers the latest technologies that will continue to increase their efficiencies and profitability", commented Micro Key Solutions President Victoria Ferro.

Both ExecKey and Tech Pro are available in the App Store and on Google Play.
